PROFESSIONAL SUMMARY

Driven Trainee Developer candidate with a strong academic foundation in Software Development (National Diploma) and currently completing an Advanced Diploma in Computer Science. Proficient in core programming paradigms including Object-Oriented Programming (OOP), Procedural Programming, and Enterprise Architecture using Java EE 7, C++, JavaScript, and MySQL. Experienced in application troubleshooting, database management, web testing, and system monitoring within IT operations. Proven leader with solid problem-solving abilities, eager to deliver impactful software solutions.

EDUCATION & ACADEMIC DEPTH

ADVANCED DIPLOMA IN COMPUTER SCIENCE

Current (2-Year Qualification)

Tshwane University of Technology (TUT)

- **Enterprise Application Development (Java EE 7):** Deep dive into multi-tier enterprise applications, RESTful web services, dependency injection, JPA/Hibernate ORM, and servlet containers.
- **Data Structures & Algorithms:** Mastered memory management, computational complexity (Big-O analysis), dynamic data structures (trees, graphs, hash tables), and sorting/searching algorithms.
- **Principles of Programming & Software Design:** Applied design patterns (MVC, Singleton, Factory), clean code principles (SOLID), modular software design, and unit testing practices.
- **Distributed Programming & Systems:** Studied client-server architecture, message passing, concurrent thread execution, socket programming, and distributed database synchronization.
- **Software Engineering & SDLC:** Practical implementation of Agile/Scrum methodologies, requirements gathering, system modelling (UML class/sequence diagrams), and version control (Git).
- **Theoretical Computer Science & Data Science:** Foundational logic, state machines, formal languages, alongside data analysis, statistical modelling, and database querying.

NATIONAL DIPLOMA IN INFORMATION TECHNOLOGY (SOFTWARE DEVELOPMENT)

Graduated: July 2021

Tshwane University of Technology (TUT)

- **Core Programming Fundamentals:** Thorough training in C++ and Java focusing on object-oriented analysis, control structures, exception handling, encapsulation, inheritance, and polymorphism.
- **Database Development & SQL:** Relational database design, normalization (1NF-3NF), writing complex SQL queries, joins, triggers, stored procedures, and MySQL administration.
- **Web Development & Frontend Technologies:** Hands-on implementation of responsive UI using HTML5, CSS3, JavaScript (DOM manipulation, asynchronous fetching), and client-side validation.
- **Systems Analysis & Deployment:** End-to-end SDLC participation, software quality assurance, test script design, debugging, and application deployment strategies.

NATIONAL SENIOR CERTIFICATE

December 2015

Sitintile High School

Strong academic focus in Mathematics, English, and Life Sciences, demonstrating analytical rigor and effective technical communication.

IT CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) — Cloud Concepts & Architecture	**Responsive Web Design** — FreeCodeCamp Certified
CompTIA Network+ Certified (N10-008) — Networking & Protocols	**CompTIA A+ Certified (Core 1 & Core 2)** — Hardware & OS Operations

WORK EXPERIENCE

IT ADMINISTRATOR
February 2026 – Present

TonTrac Systems and Analytics | Johannesburg

- **Application Performance & Monitoring:** Actively monitor application and system health across cloud, on-premise, and client-site platforms; monitor alerts and custom dashboards to detect performance degradation and protect SLAs.
- **Technical Escalations & Diagnostics:** Act as senior technical escalation point for First Line Support, diagnosing software faults, database errors, and infrastructure issues following ITIL troubleshooting frameworks.
- **Patching & System Maintenance:** Execute scheduled application software, operating system, and security patch rollouts in full alignment with strict change management and organizational security controls.
- **Audit Compliance & Security:** Maintain audit readiness for SOC 2 and ISO 27001 security frameworks through routine backup restoration testing, asset lifecycle tracking, and network hardening.

HELP DESK TECHNICIAN
February 2024 – January 2026

TonTrac Systems and Analytics | Johannesburg

- **User Access Management:** Managed cloud user provisioning, access rights, and data onboarding for logistics management applications, ensuring data accuracy and secure record keeping.
- **Application Support & Incident Resolution:** Provided high-tier remote technical support for software and hardware configurations, analysing issue logs to minimize downtime and resolve customer support tickets.
- **Data Analysis & System Reporting:** Generated and evaluated operational data reports to track system reliability and identify recurring application defects or operational bottlenecks.

IT INTERN
June 2023 – January 2024

- **Afrika Learn | Mbombela**
- **Technical Support & Configuration:** Assisted in setting up devices, configuring local networks, and troubleshooting multi-platform operating systems and virtualization setups.
- **Security & Best Practices:** Applied CompTIA Network+ and Azure concepts to assist with basic network hardening, access controls, and firewall rule verification.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

SRC President — Student Representative Council:

Demonstrated strong executive leadership, negotiation, and strategic decision-making in high-pressure environments. Led multi-disciplinary teams, managed student welfare initiatives, communicated key policy decisions to university executives, and resolved complex stakeholder disputes effectively.
